

Smart Phone Browser Support

Audience: Website Administrators, Faculty/Staff, Parents, Students, Alumni

SchoolFusion has limited support for the following Smart Phones:

- iPhone's Mobile Safari
- Palm Pre's WebOS browser
- Opera 9
- Blackberry Bolt
- Google's Android mobile OS
- WebKit based mobile Browsers

Viewing the site in these browsers works, with the following caveats:

- Content editing through the Content Editor is NOT supported; however, content can be edited through a plain text interface with mobile browsers.
- Mobile browsers that do not have flash as an option will not display the flash elements contained on our site (e.g. Thumbnail Calendar, Student Quizzes, Slideshows, and Videos).
