

## **Security/ Virus Scanning**

**Audience: Website Administrators, Faculty/Staff**

SchoolFusion takes significant measures to protect your website from viruses. We automatically virus scan all files that are uploaded to FusionPages, or within Website Administration. We also scan all outbound emails.

Most users will not notice that their files are being virus scanned. If a user does try to upload a file with a virus in it, then the file will be deleted. A warning is shown to the user to let them know a virus was scanned and the file was deleted.
